These results are indicative, not fixed and contractual.

Dry Matter	Crude Protein	Oil A	Oil B	Crude Fibre	NDF	Lysine	Starch	Sugar	Ash
92.0	7.0	16.5	17.0	2.0	7.0	0.17	38.0	21.0	2.0

Figures are shown as %.

Additional Information

This biscuit meal is at the top end of the market. It has high oil and low fibre and hence an excellent energy value. It is particularly suitable for high-energy feeds and those where a high digestibility is advantageous.

Quality Assurance

Biscuit meal is sourced solely from approved suppliers and is sold by Noble Foods Straights, a UFAS accredited merchant. A full QC of our internal, Noble analytical information is available on request.
